PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering student with a strong interest in software development and technology. Familiar with C, Java, Python, JavaScript, HTML, CSS, and MySQL, with hands-on experience developing academic and personal projects. "Interested in applying problem-solving and programming skills to build practical software solutions, while continuously learning and adapting to new technologies."

EDUCATION

B.E. Computer Science and Engineering

Dhanalakshmi Srinivasan Engineering College, Perambalur

2023 – 2027

CGPA: 7.93

Higher Secondary Education

Sri Ramakrishna Boys Matric. Hr. Sec. School, Perambalur

2023

88.3%

TECHNICAL SKILLS

Programming Languages: C, Java, Python, JavaScript

Frontend: HTML, CSS, React, Angular, Tailwind CSS

Backend: Spring Boot, Node.js, Express.js

Database: MySQL

API & Development Tools: Postman, Git, GitHub, VS Code, IntelliJ IDEA

INTERNSHIP

Full Stack Development Intern

May 2026 – July 2026

TopGrade

- Completed a two-month internship focused on full stack web development and gained hands-on exposure to frontend and backend technologies.
- Learned to build web applications using technologies such as HTML, CSS, JavaScript, React, Angular, and Tailwind CSS.
- Gained exposure to backend development using Java, Spring Boot, Node.js, and Express.js, along with API development and testing using Postman.
- Worked with MySQL for database-related tasks and explored application deployment practices.
- Used IntelliJ IDEA and other development tools as part of the learning and development process.

PROJECTS

Health Monitoring System

- Developed an IoT-based health monitoring system using sensors to monitor patient health parameters.
- Designed a web-based interface to display collected health data for real-time monitoring.
- Worked on integrating sensor data with the web application to provide an accessible view of the monitored parameters.

Intrusion Detection System

- Developing a cybersecurity-based Intrusion Detection System (IDS) to identify and monitor potentially malicious network activities.
- Contributing to the backend development and web dashboard for processing and presenting detection results.
- Working on presenting security-related information through a user-friendly web application for easier monitoring and analysis.

CERTIFICATIONS

- Academic Process Mining Fundamentals** – Celonis, March 2026
